

Tellington TTouch

Training

Evening Demonstration Friday, March 12
One and Two-day Workshops with Dogs March 13/14
Canterbury Kennel Centre, Macleans Island, Christchurch

"A gentle, respectful and effective approach to the care and training of our animals."

TTouch alleviates common behavioural issues such as leash pulling, jumping up, fear biting, submissiveness, shyness, resistance to grooming, hyperactivity, excessive barking and fear of loud noises.

TTouch supports veterinary care, enhances health and well-being, reduces stress, and speeds up healing after injury, surgery or illness.

TTouch gives you new tools for improving your animal's performance and pleasure - in competition, companionship or service.

TTouch deepens the relationship between you and your animal friend – horse, dog, bird or guinea pig!

Taught by
Edie Jane Eaton,
International TTouch Instructor and
Feldenkrais Practitioner

“ Edie Jane is a superb teacher who creates a learning situation with great ease and fluency. And gives such an insight into living with other animals, of all species!”

Rupert Watson, Feldenkrais Practitioner, Wellington.

Edie Jane is available for Equestrian and Feline workshops.
